

## 210 Moody Street Mixed-Use Development Project

Mar 2015 - Present

 Associated with Brandeis University

For nearly two months our team conducted necessary due diligence research for this mixed-use development project in Downtown Waltham. Our methodology involved personal interviews with local organizations and business owners combined with our collection of primary documents from the City of Waltham and the State of Massachusetts resources. We represented the all-undergraduate team in the 2015 Brandeis IBS Real Estate Challenge and prepared a final presentation to field experts that outlined our proposal with supporting market and financial analyses.
